1. Summary

WMAS DATA COLLECTION; KEY LINES

The following data has been extracted from the NHS Electronic Staff Record System for all employees in post on 31 March 2022. The calculations made are in accordance with the technical guidance provided by Gov.UK for the submission of the Gender Pay Gap figures and have been adjusted accordingly to calculate the requested Ethnicity Pay Gap data.

The data is based on our most recent Gender Pay Gap, formal submission, (31st March 2022) which reported staff in post as of 31st March 2022. The statutory requirement to submit March 2022 Gender Pay Gap data is 31st March 2023.

Hourly Rate

Calculations for each ethnic origin group have been compared against the hourly rates for staff from a white ethnic origin.

The arithmetic mean is achieved by adding up all the numbers in a dataset and then dividing the total by the number of items. For example: a group of numbers of 20, 22, 30, 40, 50, will add together to form 162, which will be divided by the 5 numbers in the group, and result in a mean of 32.4.

The arithmetic median is achieved by identifying the middle number in the list. In the example above, the middle number is 30, this is therefore the median. The following ethnicity pay calculations have been based on both Mean and Median values.

Ethnic Origin	Mean Hourly Rate	Median Hourly Rate	Difference in MEAN	MEAN Pay Gap %	Difference in MEDIAN	MEDIAN Pay Gap %
WHITE	£ 19.65	£ 16.42
